

**POLICY: CHEMICAL DEPENDENCY**

**NEPN/NSBA CODE: JICH**

**Philosophy**

We, the Millinocket School Board, recognize chemical dependency as a disease that is primary, chronic, progressive and treatable. We acknowledge the existence of staff members and students who fit the three populations of chemical dependency --- the experimenter/user, the affected, the non-user/non-affected.

We accept a responsibility to provide for these populations policies, procedures and programs that promote prevention, education, assistance and treatment.
